ZINGERZ TEAM 20

ARM-AI-SLOT-MACHINE

Phase 1 – Setup

Agent & Model

Gemini

gemini-3.1-pro-preview

Rubric

App Quality

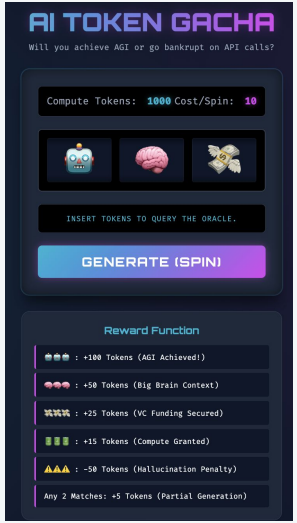
- Playability
- Visuals
- Multi-modal features

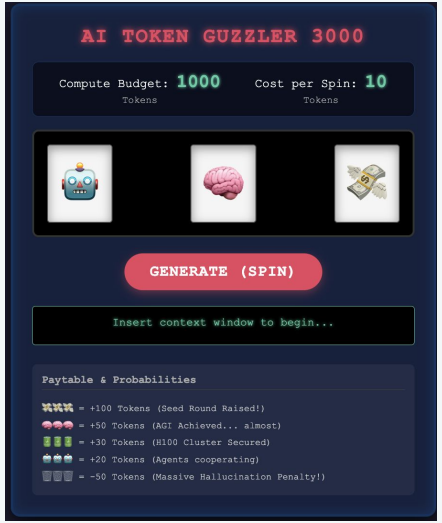
Code Quality

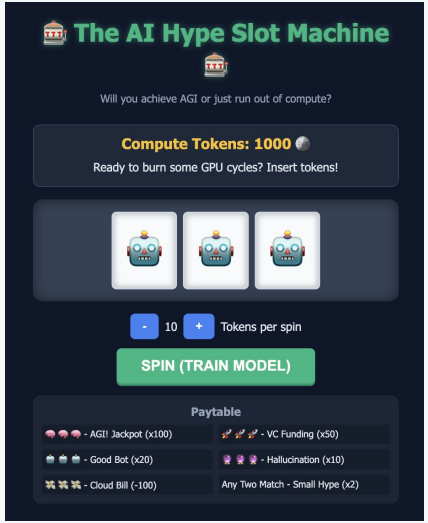
- Less lines of code
- Separate files
- Comments
- Descriptive class/variable names

Phase 2 – First Runs

- Wide variety in visuals, animations, and features across 50 iterations
- Code quality and structure varied

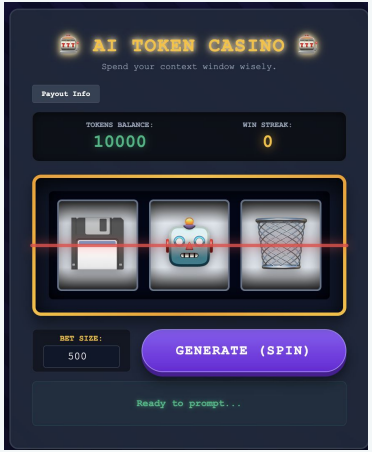


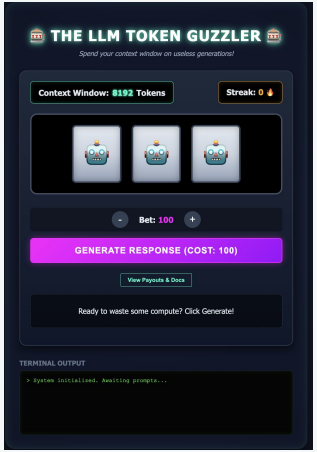


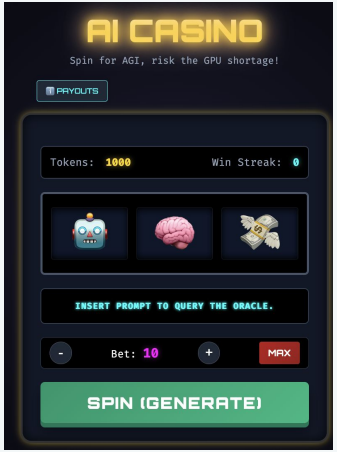


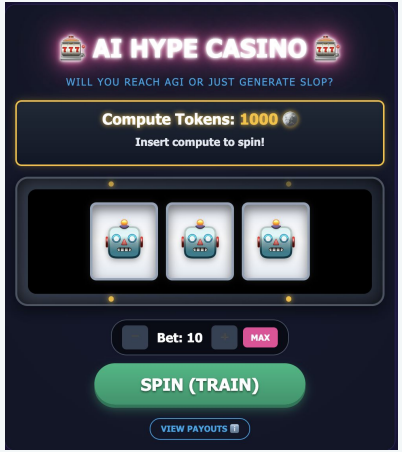
Phase 3A – Top 5

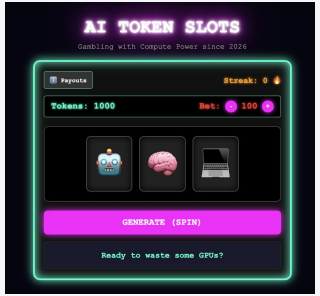
- Top 5 selected based on visuals, functionality, and creativity
- Top 5 then refined: sound effects, more flashy animations, add payout table, reset tokens, streak bonuses, AI jokes





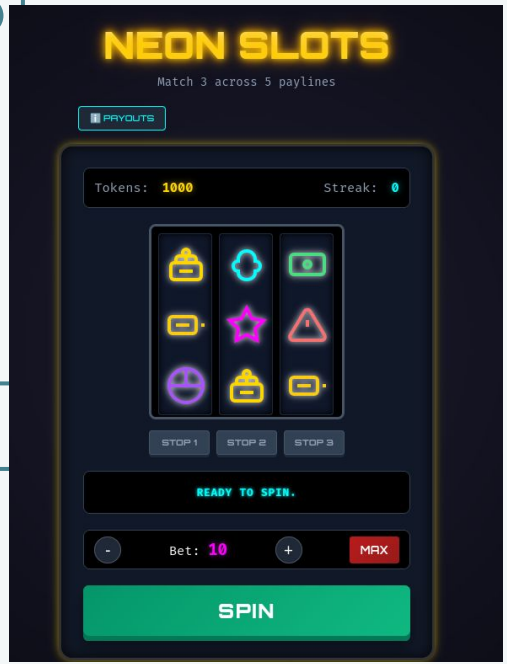


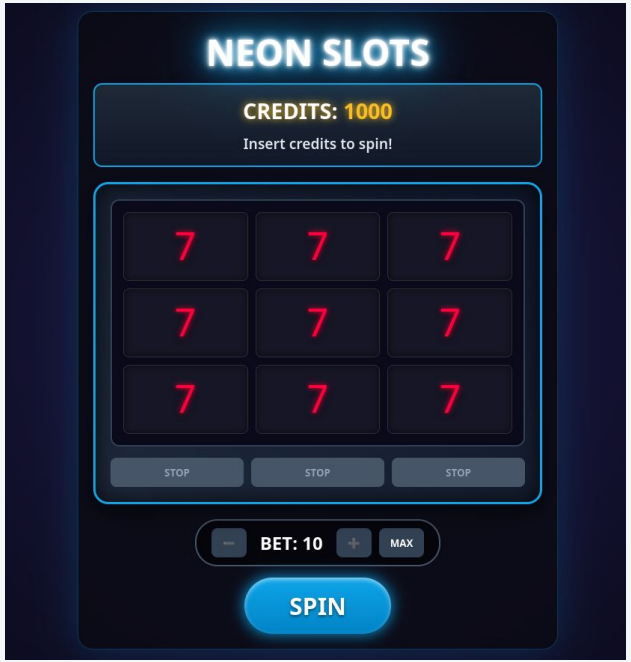


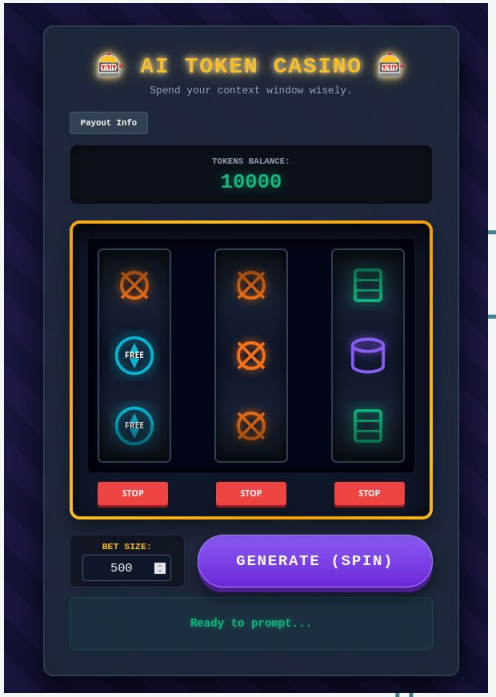


Phase 3B – Top 3

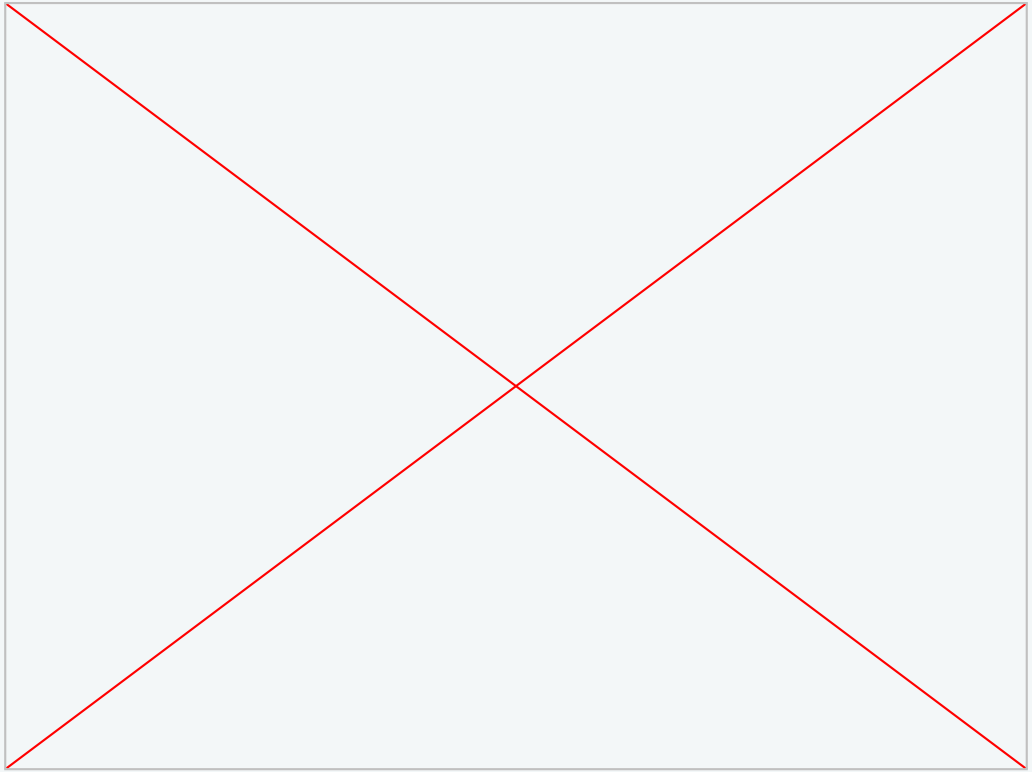
- Features requested in refinement: New SVG glowing icons, 3x3 grid, big win screen, neon paylines, additional wild card symbols, ‘Win Anticipation’







Phase 4 and 5 – Final Candidate



Final Findings

Refinement Works!

With each iteration, we saw a decent jump in features

Depth vs Breadth

Narrow in on what features you want, as the LLM does best with direct tasks over ambiguity

Little Difference in Code Quality

Once the code was made a certain way it was hard to correct

Stuff Breaks

Keep an eye out and be aware when your prompts undo progress
